

KRISPY KREME - PETERBOROUGH

COMPANY:
PDR Construction

PRODUCTS:
High Flexibility Render & 1.5mm silicone Enhanced Render & Primer

SURFACE:
Walls

SUBSTRATE:
Cement Carrier Board

A new 4,577sq/ft Krispy Kreme restaurant has opened in Peterborough, and has been finished with an external render solution from Johnstone's Trade to help maintain its clean, bright exterior.

Hodgson Rendering Specialist completed a high flexibility render onto a cement carrier board. Johnstone's Trade High Performance Render Basecoat was used to prep the surface, before a Silicone Enhanced Render Primer and Silicone Enhanced Render were applied. The combination of solutions produced a tough and durable thin coat render for long lasting exterior weather protection.
