## Johnstone's Trade Aqua Guard Durable Water Based Satin Product Guide

# Johnstone's Trade Aqua Guard

## Durable Water Based Satin

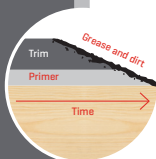

Johnstone's Trade Aqua Guard is our most durable water based satin paint for interior wood and metal. With brand new Surface Protection technology, it provides the ultimate defence against scratches, wear and tear and greasy finger marks.

It's not just about durability though, Johnstone's Trade Aqua Guard has advanced application qualities which extend the working time and covering power coupled with long-lasting whiteness.

### Standard Interior Trim

Wear and tear as a result of grease, dirt and scratches

### Johnstone's Trade Aqua Guard with Surface Protection technology

Ultimate defence; Surface Protection technology works as a guard

Scratch resistant and defends against wear and tear

The powerful technology will not soften or become damaged due to everyday wear and tear.

Johnstone's Trade Aqua Guard provides all the features you expect from a water based paint plus long-lasting durability.
